-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 5, 9, 11 and 13-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Beswick (USPN 4434548).

Beswick teaches a method of soldering an electrical connection comprising forming a plurality of terminals (4) with tips on an insulating casing (1), the terminals extending transversally through the casing, a plurality of slots having diameters smaller than the terminal widths (figure 1) formed on the bottom of the casing, applying solder material over electrical contacts of a circuit board and melting the solder (figure 2, col 2 lines 30-55 and col 4 lines 15-48). A metal sheet is embedded in the casing (col 3 lines 3-25). Each terminal is formed with a protruding part having a notch (dimple, col 2 line 56 – col 3 line 2).

3. Claims 1-3, 9-11, 15, 16, 18 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Noschese (USPN 4767344).

Noschese teaches a method of soldering an electrical connection comprising forming a plurality of terminals (26) with tips on an insulating casing (22), the terminals extending transversally through the casing, a plurality of slots (34, 38) formed on the

bottom of the casing, applying solder material (48) over electrical contacts of a circuit board (32) and melting the solder (figures 2-4 and col 3 line 65 – col 4 line 55).

Allowable Subject Matter

4. Claims 4, 6-8 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Prohofsky (USPN 3187426) and Ward (USPN 5624277).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lynne Edmondson whose telephone number is (571) 272-1172. The examiner can normally be reached on Monday through Thursday from 6:30 a.m. to 5 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Dunn can be reached on (571) 272-1171. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
